Relevant Experience

Uncle Buddy's Phantom Funhouse

Reconstruction of the 1993 hypermedia narrative game by John McDaid for contemporary computing devices
https://dtc-wsuv.org/projects/uncle-buddy/

Project Manager, September - December 2022
- Oversaw and guided the reconstruction of the digital narrative across four teams to ensure adherence to quality and deadlines
- Contributed within all teams to produce assets

Penguin Passwords

A password generator tailored towards auditory-friendly passphrases that can easily be communicated over the phone
https://labman.clark.edu/passgen

Developer, 2022
- Built in pure HTML5, CSS3 and JavaScript without add-ons
- Implemented a system for dynamically modifying key arrays for output based off of user controlled variables

Quick Tickets

A single-page react application for rapid ticket logging
https://quick-tickets-a2a67.firebaseapp.com/

Front-End Developer, 2021
- Developed using Node and ReactJS standards to dynamically pass data into a back-end.
- Implemented expanded functionality from a tutorial framework, such as UUIDv4 compliance through Node, and dynamically pulling the current date and time

Phoenix Art and Literary Journal

Clark College's Art and Literary Journal showcasing the best works of students and alumni

Layout Editor, December 2018 - March 2019
- Developed and guided the implementation of aesthetic standards for the 2019 edition of the journal
- Provided oversight and final approval of spreads before preparing them on signatures for submission to publisher
