

ELO Repository High-Fidelity Prototype Questions

- 1) Find the page for the work “Figurski at Findhorn on Acid” by Richard Holeton. Explain how you found the page (where did you look, what did you click on?).
- 2) How can you search by both the creator’s name and the date published? Explain your reasoning.
- 3) Where would you find information about how the repository is funded? Explain the path you took to find this information.
- 4) What are the three works featured in the carousel images at the top of the landing page? Explain your reasoning.
- 5) How many collections are in the “Individual Artists & Scholars” collecting area? Explain where you found your answer.
- 6) How many pages of results are listed on the “The Richard Holeton Collection” page? Explain where you found your answer.
- 7) What software dependencies does “Shy Boy” have? Where did you find your answer?
- 8) What are the major collecting areas of the repository? Explain your reasoning.
- 9) What collection is “Shy Boy” under? Explain how you found the page (where did you look, what did you click on?).
- 10) Find the work “Shy Boy” by Thom Swiss. From there, navigate to “Figurski at Findhorn on Acid” by Richard Holeton. Explain the steps you took to get there.
